Pakistan faces serious internal security challenges in the form of communal, sectarian, political, ethno-nationalist, Islamist divide and violence as well as ever-increasing terrorist and insurgent attacks. Most of these internal security challenges stem from the ideology of Pakistan and the state's failure to develop an inclusive form of nationalism. Moreover, Pakistan's insistence of using Islamist groups as levers of its foreign and security policy has further complicated the security environment of the nation. The policy of nurturing some militant groups as assets and eliminate those who fight the state has failed. Over the years it has created a society where these militant groups have spread their tentacles and are now well entrenched. How far will the Armed forces be able to overcome the Internal Security Challenges will depend upon a great deal on its intention, capability and method adopted. This book is an attempt to understand the various security challenges being faced by Pakistan and the ability of its Army to overcome

National security, in theory and practice, is about governing a nation for the well-being of the people. It is a group subject and is not the domain of a single expert of a kind. It is teamwork under leadership of excellence. What is important is the consistency of purpose providing comfort to the people of a nation and thereby the people of the world in their physical, mental and emotional domains as an ongoing process throughout their lives.

This collection of papers examines a variety of areas and issues related to, or raised by, the EU Internal Security Strategy. It covers such matters as critical infrastructure protection and environmental crime, from a range of disciplinary perspectives, including law, geography and politics. The EU Internal Security Strategy is becoming increasingly complex as it develops over time, as it has to operate against the background of growing diversity in law enforcement systems across EU member states. It is clear that the EU Internal Security Strategy is, and will continue to be for a long time, a work in progress, not only in its aim to address traditional transnational security threats, but also in reacting to emerging concerns, either in new crime areas or issues arising from the implementation of earlier phases of the strategy. This will be a subject matter for many academic discipline areas for some time to come.

Challenges to internal security in Europe (including juvenile delinquency, anti-foreigner sentiments, violence, organised crime, etc.) are increasingly affecting public perceptions of safety. This book provides an overview of the challenges to internal security, and argues in favour of a more comprehensive understanding of what internal security entails and what should be kept in mind when looking at crime statistics or when discussing offending behaviour by foreigners. It concludes that public concerns about insecurity need to be taken more seriously and that to meet future security needs, it is necessary to look beyond the traditional confines of police jurisdiction and national territory. Instead, security efforts should address international as well as local challenges that influence subjective feelings of security and affect actual conditions of public safety. In other words, internal security is no longer an internal affair of individual countries. It has become an international concern that requires both local, as well as Europe-wide and global, attention.
