the proceedings of the 31st Australasian Joint Conference on Artificial Intelligence, AI 2018, held in Wellington, New Zealand, in December 2018. The 50 full and 26 short papers presented in this volume were carefully reviewed and selected from 125 submissions. The paper were organized in topical sections named:

Lawrence Lessig, “ the most important thinker on intellectual property in the Internet era ” , masterfully argues that never before in human history has the power to control creative progress been so concentrated in the hands of the powerful few, the so-called Big Media. Never before have the cultural powers- that-be been

able to exert such control over what we can and can't do with the culture around us.

Our society defends free markets and free speech; why then does it permit such top-down control?

To lose our long tradition of free culture, Lawrence Lessig shows us, is to lose our freedom to create, our freedom to build, and,

Where To Download

Ultimately, our freedom
to imagine.

Since process models
are nowadays
ubiquitous in many
applications, the

challenges and alternatives related to their development, validation, and efficient use have become more apparent. In addition, the massive amounts of both offline and online data available today open the door for new applications and solutions. However, transforming data into useful models and

Where To Download

information in the context of the process industry or of bio-systems requires specific approaches and considerations such as new modelling methodologies incorporating the complex, stochastic, hybrid and distributed nature of many processes in particular.

The same can be said

about the tools and software environments used to describe, code, and solve such models for their further exploitation. Going well beyond mere simulation tools, these advanced tools offer a software suite built around the models, facilitating tasks such as experiment design, parameter estimation, model

developments in
methods, tools and
industrial applications.

Research conducted
over the past two
decades has shown that
poor patient
understanding of
medication instructions
is an important
contributor to the more
than 1 million
medication errors and

Where To Download

adverse drug events that lead to office and emergency room visits, hospitalizations, and even death. Patients who have limited literacy skills, who have multiple comorbidities, and who are elderly face the greatest risk, and limited literacy skills are significantly associated with inadequate understanding and use

of prescription
instructions and
precautions. The
Agency for Healthcare
Research and Quality
notes that only 12
percent of U.S. adults
have proficient health
literacy that allows them
to interpret a
prescription label
correctly. Given the
importance of health
literacy to the proper

use of medications, and the apparent lack of progress in improving medication adherence, the Roundtable on Health Literacy formed an ad hoc committee to plan and conduct a 1-day public workshop that featured invited presentations and discussion of the role and challenges regarding clarity of

communication on medication. Participants focused on using health literacy principles to address clarity of materials, decision aids, and other supportive tools and technologies regarding risks, benefits, alternatives, and health plan coverage. This publication summarizes the presentations and discussions from the
