This game-changing [\[how-to\]](#) shows leaders how to increase engagement by harnessing employees' motivation for happiness. Our efforts to increase employee engagement are failing because employees simply aren't motivated to improve their engagement. In this illuminating book from Eric Karpinski, managers and team leaders will learn the key to effectively engaging employees: focus on happiness. But not all types of happiness drive engagement; by selecting specific strategies that activate employees' inherent motivation for certain types of happiness, you can simultaneously boost engagement and organizational performance. Everybody wins. In Put Happiness to Work, Karpinski draws on his deep experience at the intersection of business and psychology to lay out a step-by-step program that includes specific activities to enhance engagement and generate happiness at work. Utilizing existing work habits and meetings, these dynamic yet simple tools will hardwire effective changes into leaders' and employees' behavior, creating long-term, sustainable engagement. Based on more than 10 years of experience applying top positive psychology and neuroscience research in the workplace, Karpinski's strategies are easy to implement and are critical to helping leaders unlock the kind of engagement organizations need to thrive.

Scott reveals vast amounts of financial accounting information drawn from recent research that has until now been hidden in academic journals. He provides a clear, easy-to-use framework for students to (1) place this information in a financial accounting context, (2) explain and analyze the information intuitively and (3) to reveal the information's relevance in understanding the practice of accounting.

People are using the future to search for better ways to achieve sustainability, inclusiveness, prosperity, well-being and peace. In addition, the way the future is understood and used is changing in almost all domains, from social science to daily life. This book presents the results of significant research undertaken by UNESCO with a number of partners to detect and define the theory and practice of anticipation around the world today. It uses the concept of [\[Futures Literacy\]](#) as a tool to define the understanding of anticipatory systems and processes [\[](#) also known as the Discipline of Anticipation. This innovative title explores: [\[](#) new topics such as Futures Literacy and the Discipline of Anticipation; [\[](#) the evidence collected from over 30 Futures Literacy Laboratories and presented in 14 full case studies; [\[](#) the need and opportunity for significant innovation in human decision-making systems. This book will be of great interest to scholars, researchers, policy-makers and students, as well as activists working on sustainability issues and innovation, future studies and anticipation studies. The Open Access version of this book, available at <https://www.taylorfrancis.com/books/e/9781351047999>, has been made available under a Attribution-NonCommercial-NoDerivs 3.0 IGO (CC-BY-NC-ND 3.0 IGO) license.

The importance of effective and well-planned presidential transitions has long been understood. The Presidential Transition Act of 1963 provided a formal recognition of this principle by providing the President-elect funding and other resources "To promote the orderly transfer of the executive power in connection with the expiration of the term of office of a President and the Inauguration of a new President." The Act received minor amendments in the following decades, but until 2010 all support provided was entirely post-election. The Pre-Election Presidential Act of 2010 changed this by providing pre-election support to nominees of both parties. Its passing reinforced the belief that early transition planning is prudent, not presumptuous. The Romney Readiness Project was the first transition effort to operate with this enhanced pre-election focus. While Obama's re-election prevented a Romney transition from occurring, it is hoped that the content of this book can provide a valuable insight to future transition teams of both parties.

This book constitutes the refereed proceedings of the 20th International Conference on Innovations for Community Services, I4CS 2020, held in Bhubaneswar, India, in January, 2020. The 16 revised full papers presented in this volume were carefully reviewed and selected from 46 submissions. The papers focus on all aspects of: communities and social networks; information and system security; cloud and network security; communication and networks; and data analytics and e-governance.

This landmark history of corporate responsibility documents corporate power and business behaviour from the mid-eighteenth century to the modern day. It shows how corporate responsibility has evolved, with the roles, responsibilities and performance of corporations coming increasingly under the spotlight as new norms of transparency and accountability emerge.
