International migration law is an important field of international law, which has attracted exceptional interest in recent years. This book has been written from a wide variety of perspectives for those wanting to understand the legal framework that regulates migration. It is intended for students new to this field of study who seek an overview of its many components. It will also appeal to those who have focussed on a particular branch of international migration law but require an understanding of how their specialisation fits with other branches of the discipline. Written by migration law specialists and led by respected international experts, this volume draws upon the combined knowledge of international migration law and policy from academia; international, intergovernmental, regional and non-governmental organisations; and national governments. Additional features include case studies, maps, break-out boxes and references to resources which allow for a full understanding of the law in context.

A stimulating survey of the key themes in international migration law.

International Migration Law provides a detailed and comprehensive overview of the international legal framework applicable to the movement of persons across borders. The role of international law in this field is complex, and often ambiguous: there is no single source for the international law governing migration. The current framework is scattered throughout a wide array of rules belonging to numerous fields of international law, including refugee law, human rights law, humanitarian law, labour law, trade law, maritime law, criminal law, and consular law. This textbook therefore cuts through this complexity by clearly demonstrating what the current international law is, and assessing how it operates. The book offers a unique and comprehensive mapping of this growing field of international law. It brings together and critically analyses the disparate conventional, customary, and soft law on a broad variety of issues, such as irregular migration, human trafficking, refugee protection, labour migration, non-discrimination, regional free movement schemes, and global migration governance. It also offers a particular focus on important groups of migrants, namely migrant workers, refugees, and smuggled migrants. It maps the current status of the law governing their movement, providing a thorough critical analysis of the various stands of international law which apply to them, suggesting how the law may continue to develop in the future. This book provides the perfect introduction to all aspects of migration and international law.

This interdisciplinary study engages law, history, and political theory in a first attempt to crystallize the lessons the global 'refugee crisis' can teach us about the nature of international law. It connects the dots between the actions of Jewish migrants to Palestine after WWII, Vietnamese 'boatpeople', Haitian refugees seeking to reach Florida, Middle Eastern migrants and refugees bound to Australia, and Syrian refugees currently crossing the Mediterranean, and then legal responses by states and international organizations to these movements. Through its account of maritime migration, the book proposes a theory of human rights modelled around an encounter between individuals in which one of the parties is at great risk. It weaves together primary sources, insights from the work of twentieth-century thinkers such as Hannah Arendt and Emmanuel Levinas, and other legal materials to form a rich account of an issue of increasing global concern.

Although the Right to Leave and Return (RLR) is a fundamental human right, each State has the sovereign right to regulate RLR in accordance with its own laws. In the case of China, the country's communist political system has significantly affected the development of RLR and the country's approach to it. As a rule, China's approach is restrictive. As part of its reform and 'opening up' policies, China has embarked on a range of reforms to liberalise RLR, but the reforms lack cohesion and focus, and

remain restrictive. Given its past and its complex social and economic conditions, China may have some justifications for its approach, but on balance, has more to gain from adopting a more liberal approach. The issue of RLR in China is crucial both for the future of China, and for development of RLR in the world. "The Right to Leave and Return (RLR) and Chinese Migration Law" provides a comprehensive and systematic review of the RLR in international and Chinese migration law. It has been written on the basis of Chinese statutes pertinent to the RLR, also of relevant international instruments and key cases. It investigates RLR in international migration law and practice; analyses RLR in the context of China, and identifies its driving factors; investigates the conditions and practical concerns relevant to the protection of RLR; and concludes with recommendations on how the Chinese regulatory regime governing RLR can be improved.

Migration is a complex and multifaceted issue, and the current legal framework suffers from considerable ambiguity and lack of cohesive focus. This Handbook offers a comprehensive take on the intersection of law and migration studies and provides strat

Since 2000, IOM has been producing world migration reports. The World Migration Report 2020, the tenth in the world migration report series, has been produced to contribute to increased understanding of migration throughout the world. This new edition presents key data and information on migration as well as thematic chapters on highly topical migration issues, and is structured to focus on two key contributions for readers: Part I: key information on migration and migrants (including migration-related statistics); and Part II: balanced, evidence-based analysis of complex and emerging migration issues.

**FOREWORD** The International Organization for Migration (IOM) is dedicated to promoting humane and orderly migration worldwide by serving the policy and programme needs of governments and migrants. The challenges of migration management reflect the contemporary challenges posed by migration itself, many of which can be turned into opportunities that can benefit countries of origin, countries of destination and migrants themselves. To be effectively managed, migration has to be looked at comprehensively, taking into account its economic, social, humanitarian, demographic, development, security and normative aspects. The normative approach to migration can be viewed mainly from two different, but complementary angles. Firstly, there are the principles and standards deriving from State sovereignty, among which are the right to protect borders, to confer nationality, to admit and expel foreigners, to combat trafficking and smuggling and to safeguard national security. Secondly, there are the human rights of the persons involved in migration. These two elements constitute the main pillars of what is generally known and accepted today as 'international migration law'.

This highly topical book demonstrates the theoretical and practical importance of the study of migration law. It outlines approaches that may be taken in the design, delivery and evaluation of this study in law schools and universities to ensure an optimum level of learning. Drawing on examples of best practice from around the world, this book uses a theoretical framework and examples from real clients and simulations to help promote the learning and teaching of the law affecting migrants. It showcases contributions from over 20 academics and practitioners experienced in asylum and immigration law and helps to unpick how to teach the complex international laws and procedures relating to migration between different countries and regions. The different sections of the book explore educational best practice, what content can be covered, different models for teaching and learning, and strategies to deal with challenges. The book will appeal to scholars, researchers and practitioners of migration and asylum law, those teaching migration law electives and involved in curriculum design, as well as students of international, common and civil law.
