Prizewinning University of Washington historian White's leading scholar of the American West, explores the intimate relationship between nature and mankind along the Columbia River.

The Organic Machine: The Remaking of the Columbia River ...

For working with the river has been central to Pacific Northwesterners' competing ways of life. It is in this way that White comes to view the Columbia River as an organic machine—with conflicting human and natural claims—and to show that whatever separation exists between humans and nature exists to be crossed.

"Organic machine" is the Columbia River and its tributaries: along this energy powerhouse, Native American fishermen and eastern adventurers, spawning salmon and man-made machines--from gill nets and fish wheels to hydroelectric dams and Hanford Engineer Works--came together to forge "a new energy regime, a new geography, and a new relationship between human labor and the energy of nature."

The Organic Machine: The Remaking of the Columbia River ...

Richard White skillfully analyzes the intertwined relationship of humans and their environment, specifically in the Columbia Basin, arguing that human labor created an organic machine that was both manmade and natural, or unmade.
