Revolutionary ideas on how to use markets to achieve fairness and prosperity for all Many blame today's economic inequality, stagnation, and political instability on the free market. The solution is to rein in the market, right? Radical Markets turns this thinking on its head. With a new foreword by Ethereum creator Vitalik Buterin and virtual reality pioneer Jaron Lanier as well as a new afterword by Eric Posner and Glen Weyl, this provocative book reveals bold new ways to organize markets for the good of everyone. It shows how the emancipatory force of genuinely open, free, and competitive markets can reawaken the dormant nineteenth-century spirit of liberal reform and lead to greater equality, prosperity, and cooperation. Only by radically expanding the scope of markets can we reduce inequality, restore robust economic growth, and resolve political conflicts. But to do that, we must replace our most sacred institutions with truly free and open competition—Radical Markets shows how.

This is a detailed reader's guide to James Joyce's masterwork Ulysses, voted the most important novel of the 20th century. The guide provides episode by episode an in depth explanation of the action and symbolism, including a description of the related books of Homer's Odyssey and the correspondences. This guide is designed to give the user the keys to the kingdom of one of the wonders of Western civilization. The non-academic author, a retired lawyer and life long Joyce reader, brings new approaches to find the deep meaning of each of Joyce's episodes and the novel as a whole. The scope of this effort, the complete Joyce, is unique in an area monopolized by more narrowly focused academics. The analysis elucidates Joyce's technique to mimic patterns in history and nature in his architecture of coherence. His medicine for the diseased spirit of our age is a custom blend of Jesus and Buddha, not as they are marketed by institutional religions, but as they lived their lives as humans. Joyce's god is more possibilities in life and art, and this guide will do that for you.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Media/Society: Technology, Industries, Content, and Users helps students understand the relationship between media and society and gets them to think critically about recent media developments. Authors David Croteau, William Hoynes, and new co-author Clayton Childress take an interdisciplinary approach with a sociological focus to answer questions like How do people use the media in their everyday lives? and How has the evolution of technology affected the media and how we use them? The Seventh Edition incorporates the latest scholarship and data that address enduring media topics, as well as new concerns raised by the role of digital platforms, the impact of misinformation online, and the role of media during the COVID-19 pandemic.

Isabella Rotman's Siren School is a funny cathartic read in the age of mansplaining. A full-color mini-comic course in Sirening 101. Do it right and men will throw themselves into the sea. "Mermaids who use the age-old art of mansplaining to sink the patriarchy to the bottom of the sea?! Glorious mermaid bodies of many sizes, shapes, and colors?! Yes, please. I have never met an Isabella Rotman comic that I did not love, and Siren School is among my favorites. Thank you, Isabella, for this salty, sassy gift of feminism-at-sea." -Kristin Russo, Everyone Is Gay
